

Learning and Belonging – Garner, et al.

Appendix. Concept Sorting Activity.

Question: How can we improve the health of Mariners' Lake?

Instructions: In order to complete this activity, move each word into the box where it fits best. The order within the box does not matter. This is only to see what you already know! If you aren't sure, go to the bottom to see the definitions. It is fine if you do not use all of the words.

You can also use your own words. If you choose to do this, write the word in an empty box. Then you will have to move the word into the space for problems or solutions.

	Make a list of problems found at Mariners' Lake	Make a list of solutions that could help Mariners' Lake
